

## Our Average Weekly Temperatures

Temperatures in Degrees F.			
Day	High	Low	Average
Monday			
Tuesday			
Wednesday			
Thursday			
Friday			
Saturday			
Sunday			

1. Add the high and low for each day.
2. Divide by 2 to get the average daily temperature for that day. Write that in the last column.
3. At the end of the 7 days, add up the 7 daily averages: \_\_\_\_\_ degrees F.
4. Divide by 7 to get the **average temperature for that week:**
